

Adding Pharmacy and Patient Messages		
Reference	How To Guide 23	
Version	1.2	
Approval date	01.02.2019	Approved by Dr Becky Locke & Dr Simon Woodworth
Review date	01.02.2020	

1. Purpose

A pharmacy message allows the user to add information specific to the dispensing of medication for the selected patient e.g. 'The next batch of repeat dispensing prescriptions are due (insert date). The patient needs a medication review before their next batch of prescriptions'. This message will show on the left hand side of the main body of the prescription.

A patient message allows the user to add information specific to the selected patient e.g. 'Please make an appointment for a medication review before next prescription'

This message will show on the right hand side of the printed prescription/token for the patient and if sent via EPS, the dispensing pharmacy should tell the patient what the message says.

Getting messages to patients requires patient and pharmacy messages as this highlights the message to the community pharmacy so that they can give the right hand side of the prescription containing the message to the patient.

2. Procedure

- Select the patient
- Select the drug that you want to add the Pharmacy message and Patient message to e.g. Paracetamol
- Right click on the drug
- Click on Edit
- Click on the arrow icon next to Pack Details on the right hand side of the screen

Generic / Trade Switch | Drug Information | Medication Review | My Record

Born [Redacted] Gender Male

Name: Apixaban 5mg tablets

Dosage: One To Be Taken Twice A Day

Quantity: 28 tablet Duration: 14 Day(s)

Rx Types: Repeat

Authorising Clinician: [Redacted]

Private ☐ Personally-administered ☐ Variable use ☐

Warnings | Drug Information | Current Medication | Past Medication | Allergies | Problems

Selected Drug - Apixaban 5mg tablets
