

Link Problem with Medications		
Reference	How To Guide 30	
Version	1.2	
Approval date	01.02.2019	Approved by
Review date	01.02.2020	

1. Purpose

To identify the clinical condition that the medication was initiated to treat, this should be carried out for all items where possible.

2. Procedure

Existing medication

- Select the patient
- Right click on the medication you are wanting to link the problem to
- Select link problems
- Select the medication to be linked from the left hand side list
- Select the appropriate problem from the right hand side
- Click and drag the medication to the problem
- Click ok

New medication

- Select the patient
- Select 'Add Drug' at the top left of the screen
- Add the medication as per procedure
- Click the 'Problems' tab in the middle of the screen
- Select the problem to be linked to the medication
- Select 'Link' from the right hand side of the screen next to the problem to be linked
- Select as appropriate 'Add Another', 'Issue', 'Issue Later'.
