2Ltr Single Use Drainable Bags – e.g. Prosys single use drainable night bag

These should be used routinely (first choice for use with a closed link system).

Each bag should last 24 hours, 3 x 10 per month.

Suggested addition to dispensed instructions "Single usage only"

2Ltr Drainable Bags – e.g. Prosys drainable 2 litre night bag/lever tap/gloves

Patients must be clinically assessed for this type of product.

Each bag should last 5-7 days as part of a closed link system. No more than 1 x 10 should be issued alternate months (6 x 10 per year).

Good practice suggest that patients or carers record the date on the back of the bag when a new bag is attached.

Suggested addition to dispensed instructions "Each bag should last 5-7 days if closed link system is not broken"

Category	Urine Drainage 2 litre leg bags and specialist drainage bag							
Indication & Features	All sterile drainage systems have needle free sample ports
